

# Refreshing the Data on the Event Mobile App

# STEP 1

From any screen on the app, click on the “More” menu option on the bottom right of the screen.

## STEP 2

On the “**More**” screen, scroll to the bottom of the screen until you see a “**refresh**” button (Android) or icon (iOS) with a “**Last Updated...**” date and time.

## STEP 3

Once at the bottom of the screen, click on the “refresh” button (Android) or icon (iOS). The “Last Updated...” should show the latest date and time now.
