Dear Ms. Kupka,

On behalf of my students, the science department, and Stonington High School, I wish to express our gratitude for Davis Standard's sponsorship of the PlastiVan program and your presence June 2 and 3. Our students truly enjoyed learning about how Davis Standard plays a key role in producing the materials that surround us.

The students were mesmerized by several of the demonstrations and were very excited by the hands-on portion. The idea of "it's not magic, it's science," resonated with them, and I believe that the program inspired them to explore careers in engineering. In fact, one student has already come to me since the presentation to talk to me about what courses to take to head down an engineering path!

It is wonderful to have community partners invested in our students, and we are so very thankful for Davis Standard's support!

Sincerely,

Rosamaria Burger
