More detail: [Click here for complete information](#)

Description: SPE's *Automotive Innovation Awards* program is the oldest and largest competition of its kind in the the automotive and plastics industries. Dozens of teams made up of OEMs, tier suppliers, and polymer producers submit nominations describing their part, system, or complete vehicle module and why it merits the claim as the Year's *Most Innovative Use of Plastics*. The competition's most coveted prize—the *Grand Award*—is chosen from winners in the other categories. Funds raised from the event are used to support SPE educational efforts and technical seminars, which help to secure the role of plastics in the advancement of the automobile.
